# Advantages for breastfeeding mothers

## 1. *Nursing discreetly*

Mammae is the only nursing bra in the world which you can use to nurse your baby in a discrete manner. You will feel at ease wherever you are and whoever you are with.

### **Innovative opening**

It's up to you to choose whether you cover or bare your breasts.

## 2. *Mammae keeps your breasts in place*

### **The inner bra with extra powernet and underwire gives the necessary support**

- Natural lift
- Breasts are nicely shaped
- You look slimmer
- Gravity has less effect, minimising the appearance of (painful) bra lines.

### **Your breasts rest supported during nursing**

### **Better nipple protection**

Mummy's with heavy chests and/or a nipple that's directed towards the floor deserve a Mammae. Mammae makes sure that the nipple is easily accessible so the baby can latch onto the breast in a correct and efficient manner.

## 3. *Mammae makes mummy's prettier*

### **The preshaped outer cup camouflages the nipples and breast pads**

The Mammae gives your breasts a better shape.

### **No more high triangles!**

Perfect to wear underneath summer tops or low cut dresses.
